

Hand Held Vascular Doppler model VD8M

A tool used in the assessment of lower limb arterial and venous disease

The hand held Unidirectional Doppler is an instrument that detects blood flow using the principles of the Doppler effect. It can be a very useful tool in assessing how good the blood flow is to the foot or hand. It is a painless test and very similar to taking blood pressure using a stethoscope. It is particularly useful for assessment of arterial disease but can also be used for venous problems.

The VD8M features a hand held Doppler with superior sound quality, extended battery life, enhanced probe sensitivity, interchangeable probes and a one year full warranty. It includes a battery recharging system so you don't have to worry about changing the battery often.

Features:

- ◆ Interchangeable Doppler Probes
- ◆ Unidirectional Doppler
- ◆ 8MHz Vascular Probe is Standard
- ◆ Continuous Wave Doppler
- ◆ Dry-cell or Rechargeable battery operation
- ◆ Charger supplied free

Specifications:

Dimensions (H,W,D)	: 125 x 75 x 26mm
Weight	: 190 grams
Battery	: 2 x 1.2V Rechargeable Batteries
Audio bandwidth	: 350Hz to 2KHz, 0.5 W

Applications:

- ◆ Ankle Brachial Index Study
- ◆ Arterial and Venous examination
- ◆ Carotid Bifurcation
- ◆ Penile artery study

Model # L150R

Non-Display, Hand Held Doppler with Recharger

The hand held Unidirectional Doppler is an instrument that detects blood flow using the principles of the Doppler effect. It can be a very useful tool in assessing how good the blood flow is to the foot or hand. It is a painless test and very similar to taking blood pressure using a stethoscope. It is particularly useful for assessment of arterial disease but can also be used for venous problems.

Features:

- ◆ Interchangeable Doppler Probes
- ◆ Unidirectional Doppler
- ◆ 8MHz Vascular Probe is Standard
- ◆ Continuous Wave Doppler
- ◆ 2 and 3 MHz Obstetrics probes
- ◆ 4, 5 and 8 MHz Vascular probes
- ◆ Rechargeable battery operation
- ◆ Charger supplied free

The LifeDop Doppler is factory configurable to include many different features and product enhancements. The LifeDop L150R features a non-display, hand held Doppler with superior sound quality, extended battery life, enhanced probe sensitivity, interchangeable probes and a one year full warranty. It includes a battery recharging system so you don't have to worry about overcharging or draining of the batteries.

Probes:

Summit Doppler ultrasound transducers were designed to meet your specific application need. Each probe has been ergonomically designed for comfort, while providing excellent maneuverability for locating the vascular target. Every probe is carefully measured and tested to ensure that it meets exacting performance standards. Probes for obstetrical application include: 2MHz, 3MHz. probes for Vascular applications: 4MHz, 5MHz and 8MHz.

Specifications:

Dimensions (H,W,L)	: 140 x 70 x 35mm
Weight	: 320 grams
Battery Life	: 1000, 1 minute operation
Battery Voltage	: 3 Nos. (AA, NMHI, 1.5Volts)
Audio bandwidth	: 350Hz ~ 2KHz, 0.5 W
